Location: Romulus, Michigan

Position Summary:

R.S. Hanline is seeking an experienced **Maintenance Engineer** to handle all maintenance needs at our Romulus, Michigan facility. This individual will be responsible for ensuring all equipment is working properly, performing preventative maintenance, and troubleshooting any issues. The ideal candidate will have a background in electrical maintenance, as well as the food manufacturing industry.

Responsibilities:

- Responsible for planning performing routine and preventative maintenance
- Troubleshoot issues and respond to breakdowns/complete repairs as needed
- Responsible for ordering and installing replacement parts as needed
- Stay ahead of required upgrades to established systems to improve efficiency
- Responsible for procuring and supervising any contracted maintenance
- Able to manage the Maintenance Department budget; maintain statistical and financial records for monitoring trends in repairs, installations, etc.
- Ensure company is compliant with any relevant health/safety legislation
- Create and implement maintenance procedures/schedules
- Manage stock of supplies and equipment

Qualifications:

- Bachelor's in mechanical, electrical, or related discipline
- Experience working with CAD software
- Knowledge of electrical and mechanical machinery
- 4+ years of experience working in a manufacturing environment, preferably in the food or fresh produce industry
- Ability to perform well under pressure in order to resolve problems
- Ability to read and understand blueprints and system schematics
- Ability to work effectively across interdepartmental teams

Physical Requirements:

- Able to lift and transport objects up to 50 pounds, as well as constantly stoop, crawl, bend, crouch, climb, and kneel.
